High Temperature Pilot Bearing

6306-2RS2HT
(2.833" x 1.179")

- High temperature "Flourine" seals are an improved version of Vitron material.
- High temperature grease is specially formulated to increase product life, exceeding the engine manufacturer's requirements.
- C5 internal clearance accommodates the new guidelines from engine manufacturers and increases product life.
- Large ball diameters result in larger dynamic radial load rating than similar products on the market.
- Ideal for today's higher torque engines that operate at a lower RPM and have a higher operating temperature.
